" - David Weaver: "I'm happy to have stumbled on your site! As a home school, I love to find sites that encourage brain activity and reinforce the facts I teach during learning time! The range of information is wonderful !!! Keep the work fantastic! " - Mrs. Janell Hancock: "Your games are Amazing! Your site has a lot to offer! This site is exactly what I have been looking for! I have four children within five years and they can all play their games! I love that you can choose your no difficulty. The games are colorful and simple, not disordered like some. The instructions are unaware of understanding and they cover the basic learning that can be neglected with other "very busy" games. I do not believe that we have a stumble on this site! I looked for "online childhood garden mathematics". This is the first one that I really enjoyed navigating to Aa and that really maintained the attention of children without discouraging them. This site will be a daily part of our learning! The children fought for those who could take the next return in the learning game! It is reinforcing everything I am trying to teach. Thank you thank you! Jill Grell Page 2 More Geography - Interactive Map Games Click on the United States to find their names. Click on the correct state. You can select regions.
